

I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you're making the television production of this program possible.

STATISTICAL IMPOSSIBILITY OF EVOLUTION

# CHARLES DARWIN

- “Why, if species have descended from other species by insensibly fine gradations, do we not everywhere see innumerable transitional forms? Why is not all nature in confusion instead of the species being as we see them, well defined?”

STATISTICAL IMPOSSIBILITY OF EVOLUTION

# MARK RIDLEY

(zoologist)

- “The gradual change of fossil species has never been part of the evidence for evolution ...”
- “Darwin showed that the record was useless for testing between evolution and special creation because it has great gaps in it ...”
- “... no real evolutionist ... uses the fossil record as evidence in favor of evolution as opposed to special creation.”

STATISTICAL IMPOSSIBILITY OF EVOLUTION

# MICHAEL DENTON

(MD, PhD)

- “Not only has paleontology failed to come up with the fossil ‘missing links’ ...”
- “... but hypothetical reconstructions of major evolutionary developments – such as that linking birds to reptiles – are beginning to look more like fantasies than serious conjectures.”

STATISTICAL IMPOSSIBILITY OF EVOLUTION

# GEORGE GAYLORD SIMPSON

(Evolutionary  
Paleontologist)

- “This (the gap in the proposed progression of horses) is true of all thirty-two orders of mammals ...”
- “The earliest and most primitive known members of every order already have the basic ordinal characters, and in no case is an approximately continuous sequence from one order to the next known.”
- “In most cases the break is so sharp and the gap so large that the origin of the order is speculative and much disputed.”

## Neptunes Wonders: *Fascinating Activity!*

Neptune *is* an amazing planet that *can't* be explained by long ages of time.

Astronomers were amazed to discover that Neptune is very active, even though it's so far from the sun. Winds can reach 1,300 mph and the planet actually *generates heat!*

Evolutionists keep looking for some weird scenario to explain Neptune. Unfortunately, many astronomers prefer to keep inventing fables, rather than admitting to a creator.
