

Beauty Is Skin Deep

David N. Menton, Ph.D

I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you're making the television production of this program possible.

-Norma Bixler

Acts 17:26

And He has made from one blood every nation of men to dwell on all the face of the earth, and has determined their preappointed times and the boundaries of their dwellings,

NKJV

The Eye's Lens *A Marvel of Chemistry!*

Our eye's lens is truly a marvel of chemistry. It contains a very high concentration of protein molecules in a transparent water solution. This discovery amazed scientists because protein molecules are not transparent, but opaque.

In the lens they pack together like the molecules of a window glass. This results in the normally opaque protein solution becoming transparent.

When it comes to the eye, creation makes sense while evolution leaves us questioning its logic.
